

Lumu Discover

Gain deep visibility into your external attack surface, continuously uncovering hidden threats and vulnerabilities that lie beyond the network. By providing actionable intelligence, Lumu Discover enables security teams to prioritize remediation efforts and proactively defend against potential attacks.

Uncover What Adversaries Know About You

Discover 'Unknown'
Internet facing assets.

Identify and remediate security gaps and misconfigurations.

Identify users at higher risk of phishing and email based attacks.

Understand **infostealer risk** in your organization.

Uncover cyber risk for 3rd party vendors.

Discover allows organizations to:

Gain actionable intelligence regarding their external attack surface exposure.

Continuously identify external visibility gaps and previously unknown risks.

Prioritize remediation activities based on business risk.

Neutralize the risk of emerging attack trends, including infostealers.

Proactively preempt adversary actions.

Full Visibility of External Threats

Gain a 360 degree view of your external attack surface with detailed information about how attackers are targeting your organization and which threats pose the highest risk.

Infostealers

Threat Actors

Code & Data Leakage

Phishing

Leaked Email Accounts

Leaked Credentials

Fraudulent Domains

Vendor & Supply Chain Risks

Key Capabilities

Unmatched External Visibility

Gain insight into exposed infrastructure, leaked credentials, fraudulent domains, and other external vulnerabilities that attackers leverage.

Actionable Insights for Precise Remediation

Detailed intelligence allows security teams to focus on the most critical risks and take immediate action.

Proactive Threat Defense

Identify and mitigate risks before they escalate into breaches, protecting your organization's reputation and operations.

Seamless Integration

Complements existing Lumu solutions, enhancing visibility and threat management across the organization.
