# Lumu SecOps **Platform**

The only security operations platform that openly integrates with your existing stack, delivering in-depth intelligence & automated defense.

2. LUMU AUTOPILOT
AUTONOMOUS INCIDENT MANAGEMENT

1. LUMU DEFENDER

PERIMETER DEFENSES

LUMU

Threat Detection and Response

EMAIL SECURITY

ENDPOINT SECURITY

IAM
VISIBILITY

5. MALTIVERSE
THREAT INTELLIGENCE

3. LUMU ARCHIVE
COMPLIANCE AND FORENSICS

EXTERNAL ATTACK SURFACE
4. LUMU DISCOVER

1 **Defender**
Lumu's Threat Detection and Response is the core of your security ecosystem. Provides complete visibility across network, endpoint, identity, and cloud while seamlessly integrating with existing cybersecurity defenses to automate threat response.

2 **Autopilot**
24x7 Automated incident management that ingests and analyzes incident threat data for managing alerts and orchestrating responses.

3 **Archive**
2-Year network log storage with retrospective threat hunting for compliance and forensic investigations.
Includes unlimited self-service log querying.

4 **Discover**
External attack surface assessment that continuously analyzes your web and dark web footprint, revealing exposed credentials, data leaks, and other attack vectors.

5 **Maltiverse**
Real-time threat intelligence with actionable insights into malicious infrastructure, IoCs, and attacker activity.

Addresses Your SecOps Practice Needs

- Uncover and respond to identity, endpoint, network, OT/IoT threats. Automate responses with existing tools.

- Visibility into compromised assets, employee credentials, leaked data, dark web exposure, and exposed infrastructure.

- 24x7 Operations and Incident Management.

- Informed decision making about evolving cyber threats.

- Fulfills compliance requirements through log retention and forensic data.

Fueling Smarter, Faster SecOps

Unify Security Operations

Break down silos with a platform built to work together, connecting detection, intelligence, and response across your entire environment.

Optimize Costs, Simplify Compliance

Cut costs and consolidate your SecOps stack without sacrificing visibility. Meet compliance requirements and reduce SIEM and EPS spend with a unified approach.

See And Stop Attacks Across The Lifecycle

Identify threats along the entire cyber-killchain, with visibility across the network, endpoints, identities, and cloud.

Accelerate Response With Built-In Automation

Leverage automated response and autonomous incident management to eliminate manual efforts, neutralizing threats at machine speed.
